June 14, 2017

Are you curious about electric vehicles?

Want to find out about the latest electric models you can buy today?

Like the idea of never stopping for fuel?

Join others who share an interest in electric vehicles of all kinds as we explore this looming revolution in transportation!

Central Ohio Electric Vehicle Association is the Central Ohio affiliate of the Electric Auto Association and we are planning for many exciting events in 2017 as electric vehicle models from Nissan, Tesla, Chevrolet, BMW and others go mainstream.

We will kick-off with a demonstration and test drive of the BMW i3 electric car, so keep watching for the mail, email and website announcements of the specific dates and locations of our meetings and multiple field trips.

Contact the club at info@coeva.org and let us know of your interests, and how best to keep you informed. Our dues are part of a \$35 membership through Electric Auto Association that includes the EAA Magazine, so be sure to join at electricauto.org. The EAA member magazine is a wealth of information, including technical details, charging discussions, and driver reviews of the surprising number of great electric vehicles of yesterday, today and tomorrow.

An electric car is in your future!
